

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method of accounting for dead nozzle remapping in a multi-nozzle printhead, the method including:
remapping a fixative intended for a dot to be printed by the dead nozzle; and,
determining a first fixative plane and a second fixative plane using dead nozzle compensation and a color plane requiring fixative;
whereby, the first fixative plane is initially used to supply fixative to the printhead,
but if the first fixative plane includes a dead nozzle then the second fixative plane is used.
2. (Currently amended) A-The method according to claim 1, wherein the remapping includes remapping the fixative to an operative nozzle to which dot data intended for the dead nozzle for printing at or adjacent a position at which the dead nozzle would have printed.
3. (Currently amended) A-The method according to claim 1, wherein the remapping includes preventing output of fixative onto the position where the dead nozzle would have printed a dot had it been operative.
4. (New) The method according to claim 1, wherein the fixative defined by the first fixative plane and the second fixative plane is a multi-part fixative.
